FEATURES & COMPETITIVE ADVANTAGE · MAY 2026

Everything a venue needs. Nothing it doesn't.

A detailed breakdown of Pelikn's feature set, platform architecture, and competitive position in the UK hospitality operations market.

COMPLIANCE SUITE

EHO-ready from day one

Every compliance record your venue needs to pass inspection — digitised, timestamped, and exportable as a PDF in one tap. Built to the UK Food Safety Act 1990 and FSA guidelines.

Temperature Logs

Fridge, freezer, cooking, reheating, hot holding and cooling records. Automatic pass/fail with corrective action prompts.

- Multiple log types per shift
- Pass/fail threshold auto-detection
- Corrective action audit trail

Allergen Registry

All 14 major allergens tracked per dish. Natasha's Law compliant. Full audit trail with QR-code-accessible public matrix.

- Dish-level allergen management
- Public QR allergen menu
- Change history & timestamps

Cleaning Schedules

Daily, weekly and ad-hoc cleaning tasks with live completion tracking and sign-off by named staff member.

- Recurring & one-off tasks
- Named staff sign-off
- Live completion dashboard

Delivery Checks

Log supplier deliveries with temperature readings, condition notes and photo evidence. Rejected items flagged automatically.

Probe Calibration

Scheduled calibration records with ice-water test results. Alerts when probes are overdue for testing.

Opening & Closing Checks

Custom digital checklists signed off every shift. Full timestamped history. No paper trail to lose.

WORKFORCE MANAGEMENT

From rota chaos to real-time visibility

Replaces spreadsheets, WhatsApp groups and separate timesheet software with a single integrated suite for scheduling, time tracking and HR admin.

Rota Builder

Drag-and-drop weekly scheduling with shift templates, role filtering and AI-assisted auto-fill. Publish rotas with a single click and staff receive instant push notifications.

- Shift templates & copy-week
- Role and department filtering
- Availability conflict warnings
- Push notifications on publish

Timesheets & Clock-in

PIN-based clock-in/out on any device. Automatic break deductions. Overtime flagging. One-click CSV export for payroll. No third-party integrations needed.

- PIN clock-in on shared device
- Automatic break calculations
- Overtime & late arrival alerts
- CSV export for payroll

Training Tracker

Food hygiene certs, allergen awareness training and custom courses. Expiry tracking with 30-day alerts. Per-staff compliance overview.

Time Off & Swaps

Staff submit leave requests in-app. Managers approve or decline. Shift swap requests between staff with manager oversight.

Labour Cost Dashboard

Real-time labour cost vs scheduled hours. Actual vs budgeted comparison. Weekly and monthly trends per role.

DAILY OPERATIONS & PLATFORM

Built for the kitchen floor, not a desktop

A platform designed around how hospitality actually works — fast-moving, high-pressure, and often without reliable wifi.

Daily Tasks & Checklists

Recurring daily tasks auto-generate each shift. One-off tasks assignable to named staff. Completion tracked with timestamps and sign-off.

Supplier Orders & Waste Logs

Log supplier orders and track waste by category. Identify high-waste items and cost leakage over time.

Staff Noticeboard

Pin announcements, policy updates and reminders. Staff see notices on login. Acknowledgement tracking for important updates.

PLATFORM HIGHLIGHTS

True PWA

Installs from browser to homescreen. No App Store. Works on iPhone, Android, iPad and desktop.

Offline-First

Records are saved locally when offline and sync automatically when connection is restored. Critical for kitchens.

PIN Authentication

Staff use 4–6 digit PINs on a shared device. No passwords. 13 granular permission types across 3 roles.

Multi-Venue Hub

Single login manages all sites. Compliance scores, labour costs and staff metrics across your entire estate.

One-Tap EHO Reports

Generate a full PDF compliance report for any date range. Ready to hand to an inspector on arrival.

TECHNICAL ARCHITECTURE

Engineered for reliability and rapid scale

Modern cloud-native stack with offline resilience. Built to handle multi-venue enterprises and thousands of daily compliance records without performance degradation.

Frontend

- React 18 + Vite 5
- Tailwind CSS v3
- React Router v6
- PWA via Workbox
- jsPDF for compliance exports

Backend & Data

- Supabase (PostgreSQL)
- Row-Level Security (RLS)
- UK-based data storage
- UK GDPR / ICO registered
- Real-time subscriptions

Deployment

- Vercel (auto-deploy)
- Zero-downtime deploys
- Edge CDN globally
- Auto-backups daily
- SSL / HTTPS enforced

Multi-Tenant by Design

Each venue is a fully isolated data silo. Row-Level Security enforced at the database level. No cross-venue data leakage possible. Enterprise-grade data isolation without enterprise complexity.

Offline-First Architecture

Service worker caches all critical assets and data. Staff can log temperature readings, complete checklists and clock in/out with zero network connection. Records sync on reconnect automatically.

COMPETITIVE LANDSCAPE

The only all-in-one built for independent hospitality

Competitors address either compliance or operations — never both — at significantly higher price points.

CAPABILITY	PELIKN	TRAIL	OPERANDIO	FOOD ALERT	COMPLIANCE4I	MANUAL
Monthly Price (1 venue)	£5–25	£30+	£50+	£60+	£40+	Free

WHY PELIKN WINS

Five unfair advantages

The combination of these factors creates a moat that compliance-only or operations-only tools cannot easily replicate.

1 Price

At £5–25/month, Pelikn is 2–10x cheaper than any comparable tool. Eliminates the “too expensive for a small venue” objection entirely.

2 All-in-one scope

Compliance + operations in a single login. Customers don’t need Trail for compliance, Rota Cloud for scheduling, and a separate timesheet tool. One bill, one system.

3 Offline-first architecture

The only digital compliance tool that works in a basement with no wifi. This is not a nice-to-have in a kitchen environment — it’s a requirement.

4 Zero-friction onboarding

No app store. No per-staff accounts. No training required. A venue manager can have the whole team live in under 15 minutes. This drives trial conversion.

5 UK-first, compliance-native

Built specifically for UK legislation: Food Safety Act 1990, FSA guidelines, Natasha’s Law, UK GDPR. Not a generic tool retrofitted for compliance.
