SafeServ

MANAGER TRAINING GUIDE · 2025

Everything you need to run a compliant, efficient venue — from daily food safety logs to staff rotas and payroll exports.

🇬🇧 UK Food Safety Act 1990 | 📋 EHO Ready | 🌐 FSA Guidelines | ★ Manager Edition

Getting Started

Login, dashboard, and your first 15 minutes in SafeServ

How to access SafeServ

Your venue has a unique URL: **safeserv.app/v/your-venue-name**. Staff log in with a PIN shown on the login screen. Managers log in at **safeserv.app/login** with email + password. Add SafeServ to your phone's home screen for app-like access — it works offline too.

The Dashboard — your command centre

The dashboard gives you an instant snapshot of what's happening across your venue right now.

Activity Feed

Recent logs across all compliance areas — see what's been recorded today at a glance.

Temperature Alerts

Out-of-range fridge or cooking temps surface here immediately so nothing slips through.

Overdue Tasks

Cleaning, checklists, and hot holding checks flagged red if overdue — so you can follow up.

Team Status

See who's clocked in right now, who's on break, and who's not started yet.

Two types of login

Staff PIN Login

Staff tap their name on the venue login screen, enter their 4–6 digit PIN, and they're in. No email needed. PINs are set up by the manager in Settings → Staff.

Manager Email Login

Owners and managers sign in at safeserv.app/login with email + password. This gives access to all management features, exports, and settings — not available on staff accounts.

Daily Operations

The tools your team uses every single shift

Clock In / Out

Staff tap to clock in and out of shifts. Live elapsed timer tracks working hours. Breaks are logged separately so paid time is accurate.

STAFF MANAGER

KEY ACTIONS

- Clock In → Start Break → End Break → Clock Out
- Manager sees full team clock status in real-time
- Missed punch? Add/edit sessions retrospectively
- Live timer shows exact time worked, excluding breaks

Tasks

Create recurring or one-off tasks and assign them by job role. Staff see only what's relevant to them and mark tasks done during their shift.

STAFF MANAGER

KEY ACTIONS

- Assign tasks by role: Kitchen, FOH, Bar, All
- Mark complete with optional notes
- Set daily recurring or one-off tasks
- View pending sign-off items from training

Noticeboard

Post announcements that all staff see when they open the app. Pin critical messages so they stay at the top until you remove them.

STAFF MANAGER PRO

KEY ACTIONS

- Post new notice (manager only)
- Pin important messages to top
- All staff see notices on their dashboard

Opening & Closing Checklists

Custom checklists for opening and closing procedures. Each item is ticked off with a timestamp and name, giving you a clear audit trail per day.

STAFF MANAGER

KEY ACTIONS

- Add custom checklist items in Settings
- Log issues directly on a failed check
- View historical completions by date
- Export to PDF for EHO files

Manager tip — set up Tasks and Checklists before opening day

Go to the Tasks section and build your role-based task list once. After that, staff see exactly what to do each shift without you needing to brief them individually. Do the same for Opening and Closing checklists in Settings — these become your daily record for the EHO.

Food Safety & Compliance

8 digital log books replacing paper — all EHO-ready

UK Temperature Quick Reference

CHECK TYPE	SAFE RANGE	FREQUENCY	ACTION IF FAILED
Fridge / Chilled	**0°C – 5°C**	AM & PM daily	Log reason, monitor, escalate if persistent
Freezer	**–18°C or below**	AM & PM daily	Check seals, transfer product if needed
Cooking / Reheating	**75°C or above**	Every batch	Return to heat, do not serve until passed
Hot Holding	**63°C or above**	AM & PM service	Reheat or discard within 2 hours
Delivery — Chilled	**0°C – 5°C**	Every delivery	Reject delivery, notify supplier
Delivery — Frozen	**–25°C – –18°C**	Every delivery	Reject delivery, notify supplier
Cooling (start)	From 70°C → ≤8°C	Every batch cooled	Must reach ≤8°C within 90 minutes

Fridge Temperature Logs

Log AM & PM fridge and freezer temperatures. Out-of-range readings are flagged and require an explanation before you can proceed.

STAFF MANAGER

KEY ACTIONS

- Log AM and PM readings for each fridge
- Set custom temp ranges per fridge in Settings
- Explain exceedances (delivery, defrost, fault)
- View history and export for audits

Cooking Temperature Logs

Record core temperatures for cooked and reheated food. Automatic pass/fail against the 75°C standard. Failed logs prompt a notes field for corrective action.

STAFF MANAGER

KEY ACTIONS

- Log food item, temp, and cook time
- Automatic ✓ Pass / ✕ Fail indicator
- Add notes on any failures
- View today's logs and full history

Hot Holding Checks

Check that food held hot during service stays at or above 63°C. Submit AM and PM checks as a batch — one tap completes the entire check.

STAFF MANAGER

KEY ACTIONS

- Complete AM and PM checks with one submission
- Add/remove hot-holding items in Settings
- Dashboard shows ✓ Done / Pending status
- History with date range presets

Cooling Logs

Track the cooling process from 70°C down to 8°C. Records cooling method and auto-fails any batch that didn't reach safe temperature within 90 minutes.

STAFF MANAGER

KEY ACTIONS

- Log start temp, end temp, and method used
- Methods: ambient, ice bath, blast chiller, etc.
- Auto-fail if end temp > 8°C
- Full history with date range presets

🚚

Delivery Checks

Log every incoming delivery with supplier, product category, and temperature. Temperature rules are applied automatically based on category — chilled, frozen, or ambient.

STAFF MANAGER

KEY ACTIONS

- Select supplier, log temp and condition
- Accept or reject with one tap
- OCR scan to read delivery label automatically
- Rejected deliveries are logged for the EHO

🧹

Cleaning Schedule

Set cleaning tasks with frequencies (daily, weekly, monthly) and assign by job role. Overdue tasks are flagged in red on the dashboard so nothing gets forgotten.

STAFF MANAGER

KEY ACTIONS

- Complete task with optional notes
- Frequencies: daily, weekly, fortnightly, monthly, quarterly
- Assign to role: All, Kitchen, FOH, Bar
- Status badges: Done / Due Soon / Overdue

⚠️

Allergen Registry

Maintain a digital allergen matrix for your menu. Generate a QR code customers can scan at the table to view the full allergen information — no printing needed.

STAFF MANAGER CUSTOMERS

KEY ACTIONS

- Add menu items and tick applicable allergens
- All 14 EU/UK notifiable allergens covered
- Generate QR code → download or print card
- Public shareable link — no login needed

🐀

Pest Control Log

Log pest sightings, inspections, and treatments. Track contractor visits and mark issues resolved. EHO inspectors frequently check for documented pest control records.

STAFF MANAGER

KEY ACTIONS

- Log sighting with pest type, location, severity
- Record contractor details and treatment
- Mark as Open → Resolved with follow-up notes
- History with date range filtering

Probe Calibration

Record thermometer calibration checks. Use the ice water (0°C) or boiling water (100°C) method to verify probe accuracy, with tolerance tracking against the expected reading.

MANAGER

KEY ACTIONS

- Select calibration method (ice / boiling)
- Record expected vs. actual temperature
- Log calibrator name and timestamp
- History of last 100 calibrations

Corrective Actions

When something goes wrong — a failed temperature, a pest sighting, a delivery reject — log the issue and the corrective action taken. Essential for HACCP compliance.

STAFF MANAGER

KEY ACTIONS

- Categories: Temperature, Cleaning, Delivery, Pest, Equipment, Food Safety, Staff
- Severity: Minor / Major / Critical
- Mark resolved with resolver name and notes
- Searchable history for audits

Waste Log

Record food waste with item, quantity, and reason. Track waste patterns over time to reduce costs. Export to PDF for management reporting.

STAFF MANAGER PRO

KEY ACTIONS

- Log item, quantity, and unit (kg, portions, litres)
- Reasons: Expired, Spoiled, Over-production, Prep, Other
- 7-day rolling view on dashboard
- Export to PDF for management review

Fitness to Work (SC7)

Staff complete a digital health declaration at the start of each shift. Flags illness (vomiting, skin conditions) and confirms hygiene practices. Required for EHO compliance.

STAFF MANAGER

KEY ACTIONS

- Staff self-declare fitness before each shift
- Two-step: Health check → Hygiene confirmation
- Manager sees all declarations with illness flags highlighted
- Automatic record-keeping for EHO visits

⚠️ **Critical — never skip temperature logs**

EHO inspectors look specifically for continuous temperature records. A gap of more than a day in your fridge or cooking logs is a red flag. SafeServ's dashboard highlights any overdue checks so your team can never accidentally miss them.

Team Management

Rotas, timesheets, training records, and time off — all in one place

Rota & Shift Scheduling

Build weekly rotas with a visual drag-and-drop scheduler. An AI assistant can draft a rota from your requirements in seconds. Staff see their shifts and can request swaps.

STAFF MANAGER PRO

KEY ACTIONS

- Create shifts with start/end times and role labels
- Use AI rota builder for quick weekly draft
- Staff request shift swaps — manager approves
- View labour cost and total hours per week
- Set venue closures to block out holidays

Timesheets & Payroll

All clock-in/out data automatically builds into timesheets. View a weekly calendar grid showing each person's hours per day, or export the full period for payroll processing.

MANAGER PRO

KEY ACTIONS

- View hours per person per day in calendar grid
- Navigate back through any previous week
- Set hourly rates per staff member in Settings
- Export to CSV (payroll) or PDF (records)
- Filter by this week, last week, this month, custom

Training Records

Digital SC6 induction sign-offs and certificate tracking. Know at a glance which staff have valid food safety training and who needs a renewal.

STAFF MANAGER PRO

KEY ACTIONS

- Sign off SC6 induction (12 standard topics)
- Upload certificates with expiry dates
- Status: Valid / Expiring Soon / Expired
- Certificate types: Food Safety, HACCP, Fire Safety, First Aid, Allergen, Manual Handling

Time Off & Leave

Staff submit time-off requests through the app. You approve or reject them with a reason. A calendar view shows who's off when — essential for rota planning.

STAFF MANAGER PRO

KEY ACTIONS

- Staff request holiday from their dashboard
- Manager approves or rejects with reason
- Calendar view — see the whole team's leave at once
- Approved leave integrates with the rota

Typical Rota Workflow

1. Check approved leave calendar
2. Open Rota → select week
3. Use AI builder or add shifts manually
4. Review cost & hours
5. Staff see their shifts immediately

Manager tip — set hourly rates for accurate payroll

Go to Settings → Staff and set each person's hourly rate. Once set, the Timesheets page automatically calculates their estimated pay for the period. Export to CSV and send straight to your payroll provider.

Audit & Compliance

Be EHO-ready every day — not just when an inspection is booked

HACCP System

Pre-built HACCP documentation covering all 5 critical control points. A live 30-day compliance dashboard shows exactly how well your team is keeping up with each area.

MANAGER

5 CRITICAL CONTROL POINTS

- Receiving (deliveries)
- Storage (fridge temps)
- Cooking (cooking logs)
- Cooling (cooling logs)
- Service (hot holding, allergens)

EHO Mock Inspection

Run a simulated Environmental Health Officer inspection on your own venue. Identify gaps before the real inspector arrives. Covers all the key compliance areas they check.

MANAGER PRO

KEY ACTIONS

- Work through the EHO checklist section by section
- Self-assess compliance for each area
- Identify and action any gaps found
- Re-run as often as needed

Approved Supplier List

Maintain your documented list of approved suppliers — a legal requirement under UK food law. Store contact details, categories, and supplier items for use in delivery checks and orders.

MANAGER

KEY ACTIONS

- Add suppliers with contact details and category
- Categories: Meat, Fish, Dairy, Produce, Dry Goods
- Add supplier items (pre-populates delivery checks)
- Active / Inactive status management

Supplier Orders

Create and track purchase orders from drafting to receipt. Status flows from Draft → Submitted → Ordered → Received, giving you a complete ordering audit trail.

MANAGER PRO

KEY ACTIONS

- Create order with line items and quantities
- Status: Draft → Submitted → Ordered → Received
- Add notes per order
- Full order history for accounts / audits

✅ Are you EHO-Ready? — Daily checklist for managers

- [ ] Fridge AM & PM temps logged today
- [ ] Opening checklist completed
- [ ] Cooking temps recorded for every batch
- [ ] Hot holding AM check done
- [ ] All deliveries logged and accepted/rejected
- [ ] Fitness to work declared by all staff
- [ ] No overdue cleaning tasks
- [ ] Allergen info up to date
- [ ] Corrective actions logged for any issues
- [ ] Closing checklist completed at end of day

🏆 **EHO inspections — what they look for**

Inspectors want to see **consistent, dated records over time** — not perfect scores. A venue with 6 months of continuous, properly-explained logs (even with some flagged readings) will always score better than one with gaps. SafeServ's continuous log books are exactly what they want to see.

⚙️ Settings & Configuration

Configure SafeServ for your venue — takes about 20 minutes to set up fully

👤 Staff Management

- Add staff members with name, role, PIN, and job title
- Set hourly rates for payroll calculation
- Assign roles: Owner, Manager, Staff
- Mark staff inactive (preserves history)
- Upload profile photos
- Multi-venue: link staff to additional venues

🏢 Venue Settings

- Set venue name and branding
- Configure fridge units with custom temp ranges
- Add hot holding items
- Set break duration policy (minutes)
- Add venue closures / holidays
- Toggle features on/off for your venue

🔔 Notifications & Preferences

- Enable push notifications (requires PWA install)
- Choose which events trigger a notification
- Dark / Light mode toggle
- Multi-venue: add and switch between venues

🛠️ First-time setup checklist

- Add all staff with PINs and hourly rates
- Add hot holding items
- Set up opening & closing checklist items
- Enter your menu items in the allergen registry
- Create your fridge units with temp ranges
- Build your cleaning schedule
- Add your approved suppliers
- Run a mock EHO inspection

Plans & Features

Everything included in Starter and Pro

Starter

£5/month

- ✓ Dashboard & tasks
- ✓ Clock In / Out
- ✓ Fridge temperature logs
- ✓ Cooking temperature logs
- ✓ Hot holding checks
- ✓ Cooling logs
- ✓ Delivery checks
- ✓ Opening & closing checklists
- ✓ Cleaning schedule
- ✓ Allergen registry & QR code
- ✓ Pest control log
- ✓ Probe calibration
- ✓ Corrective actions
- ✓ Suppliers
- ✓ Fitness to work (SC7)
- ✓ HACCP documentation
- ○ Rota builder
- ○ Timesheets & payroll export
- ○ Training records

Pro

£25/month

- ✓ Everything in Starter
- ✓ **Rota builder** + AI assistant
- ✓ **Timesheets** + payroll CSV/PDF export
- ✓ **Training records** (SC6 sign-offs + certificates)
- ✓ **Time off** + leave calendar
- ✓ **Waste logs** + PDF export
- ✓ **Supplier orders** + tracking
- ✓ **Noticeboard**
- ✓ **EHO Mock Inspection**
- ✓ **Multi-venue** support
- ✓ Shift swap management
- ✓ Venue closure management

Multi-venue add-on: additional venues at £15/mo each · QR code allergen add-on £1/mo

- Time off management
