

PELIK N PLATFORM · 2025

Built for the *kitchen,* not the office.

Every feature in Pelikn exists because a hospitality operator asked for it – and couldn't find it anywhere else.

Module deep-dives

03
Competitive landscape

04
Why Pelikn wins

SECTION 01

The *platform*

One app that replaces five tools – built mobile-first for teams that work on their feet.

THE OLD WAY

A temperature log on a clipboard. A rota on a whiteboard. Holiday requests by text. Staff files in a drawer. Compliance checked once a year, when it's too late.

This is still the operational reality for most UK hospitality businesses. Pelikn replaces every one of these with a single app – and makes the data available in real time, on any device.

6

distinct modules in one subscription

**iOS
&****Offline**

works without Wi-Fi – syncs when connected

HACCP

food safety framework baked in from day one

Compliance Hub

FOOD SAFETY & EHO READINESS

Digital temperature logs, HACCP checklists, allergen records, and EHO audit prep – all timestamped, signed, and exportable.

- Probe temp logging with pass/fail thresholds
- Natasha's Law allergen matrix
- EHO inspection simulator
- Corrective action audit trail

Rota & Scheduling

DRAG-AND-DROP SHIFT MANAGEMENT

Visual weekly rota with role-based colour coding, conflict detection, and instant push notifications to staff on shift changes.

- Drag-and-drop schedule builder
- Availability and contract-hour guardrails
- Shift swap request & approval flow
- Labour cost live preview

Timesheets

CLOCK-IN, PAYROLL-READY EXPORT

Staff clock in on their phone. Managers approve. Payroll exports in minutes. Zero-hours accrual calculated automatically.

- GPS-assisted clock-in/out
- Zero-hours holiday accrual (12.07%)
- Manager approval workflow
- CSV export for payroll

Leave Management

HOLIDAY REQUESTS, NO PAPERWORK

Staff submit leave requests in the app. Managers approve with one tap. Calendar view shows coverage gaps before they happen.

- Annual leave balance tracking
- Approval/decline with reason
- Team calendar overlap view
- Statutory leave types (sick, maternity, etc.)

HR & Staff Files

DOCUMENTS, CONTRACTS & DISCIPLINE

Secure digital staff files: contracts, certifications, disciplinary records – with expiry tracking and automated reminders.

- Document upload & e-sign ready
- Certification expiry alerts
- Disciplinary & grievance logging
- Right-to-work record keeping

Daily Checks

OPENING, CLOSING & CLEANING

Customisable checklists for every shift. Managers see completion in real time. Photo evidence attached inline.

- Custom opening & closing checks
- Photo capture per task
- Real-time completion dashboard
- Escalation for missed items

REAL SCENARIO

"The inspector arrived at 10am. By 10:03 I'd handed them my phone - *every temperature log, every allergen record, every corrective action* for the past 90 days."

A Pelikn customer, following a 5-star FSA inspection in March 2025. The alternative: 20 minutes hunting through paper binders while the inspector waited.

01

Temperature Logging

Probe readings entered on-device with pass/fail thresholds set per product type. Failed readings trigger an immediate corrective action prompt – logged, timestamped, signed. Graphs show trends over time.

02

Natasha's Law Compliance

Full allergen matrix for every menu item – the 14 declarable allergens tracked per dish. Meets the October 2021 Natasha's Law requirements for pre-packed-for-direct-sale foods. Printable for labelling.

03

EHO Audit Simulator

A digital walkthrough of what an Environmental Health Officer checks – structured around FSA inspection criteria. Gives managers a readiness score before the real thing arrives. Flags gaps with guided remediation.

WHAT THE FSA CHECKS

Hygienic food handling	Pelikn ✓
Cleanliness & condition of facilities	Pelikn ✓
Food safety management system	Pelikn ✓
Temperature control records	Pelikn ✓
Allergen information	Pelikn ✓
Corrective actions logged	Pelikn ✓

PLATFORM ACCESS

Compliance data is accessible from any device – iOS, Android, or web. All records are cloud-synced, date-stamped, and exportable as PDF for inspectors who want a printed copy.

iOS App

Android App

Web Dashboard

Offline Mode

PDF Export

HACCP-aligned

Every temperature log, cleaning record, and corrective action maps to a HACCP critical control point. The system is structured around how food safety law expects records to be kept – not how a generic form builder works.

People *Operations*

Rota, timesheets, leave, HR and daily checks – all connected, all in one place for the whole team.

The average hospitality manager spends **6–8 hours per week** on admin that Pelikn automates – rota building, timesheet reconciliation, holiday tracking, compliance logging.

6–8 hrs
saved per week

ROTA & SCHEDULING

Know your labour cost before you publish.

Build the week's rota in the drag-and-drop grid. As shifts are placed, the live labour cost updates. Publish with one tap – staff get notified instantly on their phones.

- Role & colour-coded shifts
- Contract-hour conflict warnings
- Shift swap requests in-app
- Multi-venue support

TIMESHEETS & PAYROLL

From clock-in to payroll in under five minutes.

Staff clock in and out on the Pelikn app. Zero-hours holiday accrual is calculated automatically (12.07%). Managers approve, then export a clean CSV to their payroll provider.

- GPS-assisted clock-in
- 12.07% holiday accrual
- Manager approval workflow
- CSV payroll export

HR & STAFF FILES

Everything on a team member, in one secure place.

Digital staff files with contracts, certifications, and disciplinary records. Expiry reminders mean food hygiene certs and right-to-work documents never slip through the cracks.

- Document upload & storage
- Cert expiry notifications
- Disciplinary & grievance log
- Right-to-work records

LEAVE MANAGEMENT

Staff submit holiday requests from their phone. Managers approve or decline – with a reason – from the dashboard. The team calendar shows coverage gaps before they become a problem.

Annual leave · Sick leave · Maternity/Paternity · Unpaid leave · Bank holidays

DAILY CHECKS

Custom checklists for opening, service, and closing – with photo evidence attached per task. Managers see completion in real time. Missed items escalate with a push notification.

Opening checks · Cleaning records · Service checklists · Closing sign-off · Photo capture

The *landscape*

No single competitor covers both compliance and people operations in one mobile-first product.

Hospitality operators cobble together 3–5 separate tools to cover what Pelikn does in one. Each tool means another login, another monthly bill, another training session for staff. The

comparison below uses publicly available feature lists.

FEATURE	PELIKN	TRAIL APP	ROTAREADY	DEPUTY	NOURISH	PAPERTRAIL

● = full feature included · Partial = limited or add-on · – = not available. Based on publicly available feature information, June 2025.

SECTION 04

Why Pelikn *wins*

Four structural advantages that are not easy to replicate once Pelikn is embedded in a team's daily workflow.

01

One product. Not five.

Compliance, scheduling, timesheets, leave, HR, and daily checks – all in one subscription, one login, one mobile app. Every competitor solves one category. Pelikn solves the whole operational stack.

02

Built for the kitchen floor.

Mobile-first, offline-capable, operable with one hand. Designed for a chef mid-service, not an office manager at a desktop. Competitors retrofitted mobile onto web apps. Pelikn started on the phone.

03

Flat pricing that scales.

£25/month per venue – unlimited staff, unlimited users. Competitors charge per head, meaning costs balloon as teams grow. For a 20-person kitchen, Pelikn can be 70% cheaper than per-user alternatives.

04

Compliance and operations unified.

The staff member who logs today's temperatures is the same one who's on the rota tomorrow. That connection – compliance data tied to specific team members and shifts – is unique to Pelikn and impossible to replicate with separate tools.

THE SWITCHING COST

Once a team's rota history, compliance records, staff files, and daily check logs are in Pelikn, the cost of switching is high – not because Pelikn locks data in, but because the operational habit is built into every shift, every day.

92%

expected 12-month
retention target

Compliance, scheduling, people. *One app.*

We'd love to show you Pelikn in a live demo – on your phone, running the checks your team runs every day.
