

PELIK N GTM STRATEGY · 2025–2026

The right venue. The right *moment*. The right message.

A focused, channel-efficient route to the UK's 90,000 independent hospitality venues – starting with the ones who feel the compliance pressure most acutely.

Phase roadmap

SECTION 01

Who we're *targeting*

We're not going after every hospitality business.
We're going after the ones who feel the compliance and admin burden most acutely – and have the authority to change it.

ICP 01 · PRIMARY

The Independent Restaurant Owner

"I'm the one doing the temperature logs at 11pm because no one else knows where the clipboard is."

1–3 site operator, 10–25 staff. FSA-rated. Spending 8+ hours/week on admin. No dedicated HR or ops person – it all falls on them.

→ Decision maker, credit card buyer, immediate pain

ICP 02 · SECONDARY

The Multi-Site Group Manager

"I manage compliance for four sites and each one does it differently. There's no consistency and I can't audit any of them remotely."

3–10 site group. 30–100 staff. Mix of employed and zero-hours contracts. Needs centralised oversight. Has tried spreadsheets and found them lacking.

→ Longer sales cycle, higher ACV, strong referral potential

ICP 03 · EMERGING

The New Venue Operator

"We open in six weeks. I need to know what compliance records I have to keep from day one – and I've got no idea where to start."

Pre-opening or recently opened. FSA registration in progress. Small team, limited budget, high anxiety about getting compliance right. No legacy systems to migrate from.

→ Easy conversion, grows with the product, strong LTV

The best moment to reach a venue owner isn't when things are calm. It's the week after an EHO inspection, a bad Tripadvisor review citing food safety, or a payroll error that took four hours to untangle. *That's when they're ready to change.*

Our acquisition strategy is built around these trigger moments – identifying venues that have recently experienced a compliance event or operational pain point, and reaching them when the problem is still fresh.

still use paper or spreadsheets for compliance

£320M

serviceable addressable market at £25/venue/month

£25

flat monthly price – less than one hour of manager time

SECTION 02

How we *reach them*

Four channels, each chosen because it reaches venue owners in moments of genuine need – not just browsing.

CHANNEL 01 · OWNED

Content & SEO

Venue owners search for help when they have a problem – "how to pass EHO inspection", "temperature log template UK", "Natasha's Law compliance." We meet them there with genuinely useful content that builds trust before the sale.

- FSA inspection prep guides (gated downloads)
- Natasha's Law allergen compliance toolkit
- HACCP template library – free, ungated
- "How to run a 5-star kitchen" blog series
- Google Business targeting: "food safety software UK"

Investment: Content writer + SEO tooling · Low CAC, compounds over time

CHANNEL 02 · PAID

Performance Marketing

Highly targeted Google Search and Meta campaigns aimed at hospitality operators actively searching for compliance or scheduling solutions. Tight audience segmentation – not spraying budget across broad keywords.

- Google Search: compliance + scheduling intent keywords
- Meta retargeting: engaged content readers
- LinkedIn: hospitality group managers and operators
- YouTube pre-roll: venue owner how-to content
- Target CPA: <£120 (payback in <5 months)

Investment: £3k–£5k/month budget · Scales with conversion efficiency

CHANNEL 03 · PARTNERSHIP

Trade & Industry Partners

The people venue owners already trust – their EHO consultant, food safety trainer, hospitality accountant – are warm referral channels. A trusted advisor recommendation converts faster and sticks longer than any ad.

- Environmental Health consultant referral programme
- Hospitality trade bodies (UKHospitality, BII)
- Food safety training providers (co-marketing)
- Hospitality-focused accountants and payroll bureaux
- EPOS and booking system integrations

CHANNEL 04 · PRODUCT-LED

Free Trial & Referral

The product itself is the best sales tool. A 14-day trial with full feature access removes risk and lets the daily habit form before the ask. Referrals spread inside industry networks – hospitality is a tight-knit community.

- 14-day free trial – no card required
- In-app onboarding: live compliance check in 10 minutes
- Owner referral: one month free per referred venue
- Group pricing incentive for multi-site operators
- App Store and Google Play organic discovery

Channel mix target (Year 1): 40% organic/content · 30% paid acquisition · 20% partnerships · 10% referral. As referral and partnership momentum builds, paid share reduces.

<£120

target blended CAC

SECTION 03

The conversion *journey*

From first contact to paying customer – a funnel designed around how hospitality owners actually make purchasing decisions.

1,000

Aware

Visited landing page, read a compliance guide, saw a social ad, or heard about Pelikn from a peer. Problem is recognised; solution not yet considered.

Traffic

350

Engaged

Downloaded a resource, watched a demo video, signed up for the newsletter, or clicked through to pricing. Actively exploring options.

35%
engage

140

Trial

Started a 14-day free trial. Running their first compliance check or building their first rota. The habit is forming. No card on file yet.

40%
trial

70

Paying Customer

Converted to a paid plan. Has used Pelikn for at least one compliance check, one completed rota week, and received their first payroll export.

50%
convert

The "aha" moment

Completing a first temperature log with a pass/fail alert, or publishing a rota and seeing staff get notified instantly. Usually happens within 48 hours of signup.

Guided onboarding

In-app checklist walks new users through their first compliance check, rota, and timesheet export. Completion rate predicts conversion within 7 days.

Staff adoption

When team members download the app and start clocking in, the owner sees value from day one – without entering any data themselves.

Price anchoring

£25/month lands well against a £45+ competitor subscription or the cost of one hour of admin time. The comparison is the conversion argument.

Once a team's compliance records, rota history, and staff files are in Pelikn, the operational habit is embedded into every shift. Churn is low when the product is used daily.

Monthly business health report	Engagement
Proactive cert expiry reminders	Stickiness
Annual compliance review summary	Value proof
Multi-site expansion prompts	Expansion revenue

SECTION 04

Phase *roadmap*

Three distinct GTM phases – each with a clear focus and measurable exit criteria before moving to the next.

PHASE 01 · NOW → Q3 2025

Foundation & Proof

100 paying venues. Learn what converts and why.

Direct founder-led outreach to independent restaurants across Northern Ireland. Content publishing begins. Free trial funnel live. Every customer interviewed personally. Feedback fed directly into product.

100

venues · exit criteria

PHASE 02 · Q4 2025 → Q2 2026

Channel Scale

500 venues. Paid acquisition and partnerships firing.

Performance marketing switched on with proven messaging. First partnership deals live. Referral programme launched. Sales playbook documented from Phase 01 learnings. First account management hire.

500

venues · exit criteria

PHASE 03 · Q3 2026 →

Market Leadership

2,000+ venues. The category default.

Expand into hospitality groups and chains. Launch vertical-specific features (pub, café, hotel kitchen). Trade press presence established. Explore EPOS or booking system partnership for distribution at scale.

2,000+

venues · target

GEOGRAPHIC FOCUS

Northern Ireland first, then mainland UK.

Northern Ireland is our launch market – tighter community, faster word-of-mouth, and the same FSA food hygiene framework as the rest of the UK. A proven product here is the

VERTICAL FOCUS

Restaurants first, then pubs and cafés.

Full-service restaurants have the highest compliance burden and the highest willingness to pay. Pubs and cafés follow in Phase 02 with features tuned to their specific workflows.

foundation for expansion into Belfast's city venues, then mainland UK cities in Phase 02.

£300

ARR per venue (Pro plan, monthly billing)

£600k

ARR at 2,000 venues – Phase 03 target

<5mo

payback period at target CAC of £120
